## Skills

- **Languages**: C++, C, python, JavaScript, OOPS
- **Frameworks**: Flask
- **Tools/Platforms**: MySQL, HTML and CSS
- **Soft Skills**: Problem-Solving, Team Player, Adaptability

## Projects

**Filmscope – Interactive Excel Dashboard**: April 2025

- Designed an interactive Excel dashboard analyzing global movie trends, including ratings, revenue, genres, and release patterns.
- Used Pivot Tables, Power Query, and slicers to create dynamic filters for year-wise and category-wise insights
- Applied data cleaning, transformation, and aggregation to build accurate trend visualizations Designed charts (line, bar, donut, heatmap) for clear storytelling and decision-making
- **Tech**: Excel, power query

**Product-Purchase-Predicter**: July 2025

- Developed a machine learning–powered web application that predicts the likelihood of a customer making a purchase based on behavioral and demographic features.
- Implemented Logistic Regression and Decision Tree models using scikit-learn, trained on cleaned and transformed customer interaction data
- **Tech**: Flask, Python, HTML, CSS

**RAG model for Dsa**: February 2026

- Developed a Retrieval-Augmented Generation (RAG) conversational question-answering system designed specifically for Data Structures and Algorithms (DSA) documents.
- Implemented semantic search using Chroma DB and Sentence Transformers embeddings to retrieve the most relevant document chunks.
- Integrated LangChain with a local Hugging Face language model (FLAN-T5) to generate grounded answers from retrieved context.
- Built a Flask-based backend with a ChatGPT-style web interface using HTML, CSS, and JavaScript for interactive question answering.
- Implemented conversation memory and query rewriting to improve follow-up question retrieval accuracy.
- **Tech**: Python, LangChain, Chroma DB, Hugging Face Transformers, Sentence Transformers, Flask.

## Training

**Machine Learning with data science | Cipher Schools**: July 2025

- Completed an intensive summer training program in Machine Learning and Data Science.
- Gained practical experience in the end-to-end data science lifecycle, including data preprocessing, exploratory data analysis (EDA), feature engineering, and building/evaluating predictive models.
- Utilized key Python libraries such as Pandas, NumPy, and Scikit-learn.
- **Tech**: Python, Flask.

## Certificates

- Machine Learning with Data Science | Cipher Schools — July 2025
- Bits and Bytes of Computer Networking | Coursera — September 2024
- Completed Community Development Program | HelpAge India — July 2024

## Achievements

- Solved more than 200 problems in Leet Code

## Education

- **Lovely Professional University** — Phagwara, Punjab
  *Bachelor of Technology - Computer Science and Engineering;* ***CGPA: 7.9*** — *Since August 2023*
- **Sainik School Ambikapur** — Ambikapur ,C.G
  *Intermediate;* ***Percentage: 66%*** — *April 2020 - March 2022*
- **Sainik School Ambikapur** — Ambikapur, C.G
  *Matriculation;* ***Percentage: 89%*** — *April 2019 - March 2020*
